### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (US 6,758,014).

Regarding claims 1, 2, 4-12, US'014 teaches of a rectangular frame (See elements 3, Fig. 1 on both sides creating a rectangular frame) with element 3 (Fig. 16) being the principal rafter supporting the main beam (See intermediary, vertically oriented beams 4 between pillars 11). The intermediary beams do not have a number label, however they are adjacent the on frame. The corners of the frame 3 are arranged such that a plate (17) is pinned to said pillars (See Fig. 11).

Art Unit: 3635

Regarding claim 3, US'014 teaches of secondary support members (See clamping plate, 35 Fig. 17) that add supports for external mesh (5).

Regarding claims 13-16, US'014 teaches of all of the critical elements of the invention, as claimed, therefore inherently discloses the method steps that are necessary to erect the framework. Building a rectangular frame and placing it upon pillars and pinning it together is notoriously well-known and previously disclosed in the art.
